Acronova Technology, Inc. DupliQ CD/DVD Recorders are now supported by Double Century Software's, Quarter Encoder.

Ripping music CDs becomes easier!

New Brunswick, NJ August 1st, 2006 - Acronova Technology's CD/DVD Recorders, DupliQ, are now compatible with Quarter Encoder, a music ripping solution developed by Double Century Software, Inc. Quarter Encoder is designed to convert whole CD collections into digital music and uses the All Media Guide's database (www.allmusic.com) to organize CDs. Using the Quarter Encoder together with a DupliQ CD/DVD Recorder, you can painlessly rip large music collections. By loading a stack of 25 CDs in a DupliQ CD/DVD Recorder, the Quarter Encoder can automatically digitize each CD, saving you from sitting in front of the computer loading and unloading each disc.

Quarter Encoder's Key Features:

- MP3 & WAV Digital Music Formats
- MP3 Constant, Average and Variable Encoding
- MP3 96kbps >>> 320 kbps Bit Rates
- High Quality AMG CD Information
- AMG Album Art
- Integration of FreeDB Database
- Full Reporting Capabilities

About All Media Guide Database

All Media Guide's database is a music database which includes information of the artist, album, genre, etc. and even album cover art. The database is used to tag digital music files and organize them in an orderly fashion. Unlike other existing databases, AMG provides clean and up-to-date information regarding millions of CDs. For example, the Quarter Encoder will create perfectly structured libraries without issues like inconsistent names such as "Rolling Stones", "The Rolling Stones", or "Rolling Stones, The".

Quarter Encoder is available through Double Century Software, Inc. and certified resellers. For more information, please contact:
