

Your Inkjet Printer Prints on Disc Manually Now It Can Automatically Burn/Label 100 Discs

Nimbie Sidekick Caddy-Loader Series Automatic Inkjet Direct-on-Disc Publishing Solution

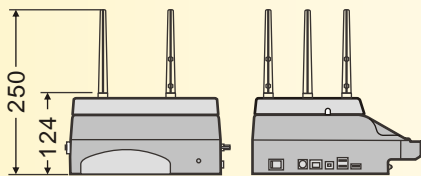

Your Epson inkjet printer prints on paper in auto-feed, yet it labels disc in manual-feed -- one disc at a time via manually feeding the caddy. The Nimbie Sidekick auto-feeds the caddy for automated publishing of 100 or more discs using the original Epson printer.

With no modification to the printer required, simply attach Nimbie Sidekick to the printer for automated disc publishing use. Detach the Nimbie Sidekick and it is back for paper printing use.

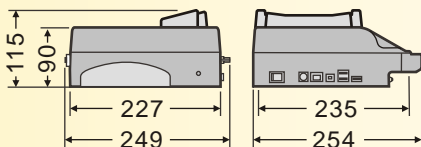

Many traditional all-in-one disc publishers are costly and require expensive proprietary ink cartridges. Nimbie Sidekick is the most affordable solution to automatically create 6-color, professional-looking discs and to effectively take advantage of separate cartridges to save ink cost.

**Save Ink Cost
Quick Device Swap**

NK50V Auto-Print Solution

NK-50Y Burn & Print Solution

Specification:

Application	Work with selected inkjet printer and disc-burning device for automatic publishing of optical discs (NK50V: label disc only; NK50Y: burn data and label discs)
